

In current midwifery practice, one of the competencies covered by midwives is medicines management. Midwives and students are required to have an understanding of the range of medicines used within their sphere of practice. The Midwife's Pocket Formulary provides both practising midwives and students with key information on the administration and management of medications in midwifery practice. Essential information, at a glance
Convenient, pocket-sized format
Clear, worked examples of drug calculations
Information on drug calculations now includes neonatal calculation and alternative calculation methods used by some HEIs
Antidepressants expanded to include current treatment therapies for existing mental health conditions, with safety information and guidance on current medications
Intravenous fluids comprehensively updated and extended
Emergency drugs completely revised to complement the NICE and RCOG guidance, with medications for each emergency grouped and cross-referenced to aid the reader
Supported by up-to-date clinical guidelines from the National Institute of Clinical Excellence (NICE) and the Royal College of Obstetricians and Gynaecologists (RCOG)
Green top guidance
Online pronunciation guide for drug terms and names.
